

DUSEL Cascades

BRIDGE CREEK PORTAL CONCEPT
IN ACCORDANCE WITH:
PROponents' PRE-PROPOSAL (MAY 2004)

DRAWING
PREPARED BY THE
ICICLE VALLEY PROTECTION ALLIANCE
APRIL 2005

Several acres will be needed for a staging area during construction. The only level land is in the 300-foot riparian zone along Icicle Creek. The land beyond the riparian zone is steep mountainside which will have to be cut and filled to create five acres of flat ground. This will result in a 60-foot cut above a fill embankment of 70 feet. The total height of destroyed mountainside will be 130 feet or roughly 13 stories. Note the scale measurements and relative size of cars and people.
