If You Climb, Hike or Camp in

ICICLE CANYON

LEAVENWORTH, WA

This beautiful place may be damaged

A National Underground Science Lab (NUSEL) has been proposed for Mt. Cashmere near Eightmile and Bridge Creek area...

Six miles of tunnels will be drilled

(partly under the Alpine Lakes Wilderness)

and the Icicle Canyon Road rebuilt and straightened to Federal Highway Standards.

Roadside climbing / hiking areas could be destroyed.

Four to eight years of construction — 60+ large truckloads of rock going down the road every day, year-round, for years.

The water of Icicle Creek could be polluted by toxic spills.

Leavenworth's watershed is in jeopardy.
